SERICOL

New Pantone Scale Weight Variants

Issue No: MD160-2105-001
Issue Date: 13/05/2021

Colour management plays a very important part in print.
Controlling colour consistency in Pantone matches provides a vital way for printers to control costs in their daily workload.

Sericol Brand Pantone Scales have provided a dependable solution for printers for many years and have sold 1000's of scales throughout the world.

These scales still provide an excellent low cost solution for colour consistency and control. They are also intended to help lock in customers to Sericol brand inks. It is intended to be used as a low or no cost solution to the customer to secure continuous ink sales.

The scales are now available in 3 weight capacity variants, 5kg, 10kg & 15kg.

The different weight capacities mean that each version has a slightly different weighing performance. This is related to its weighing capacity which is outlined below.

Please also note the product code for the original 5kg scale has also changed:

Old Code	New Code	Description	Weight Performance
CJE15	PTS05	Sericol Pantone Scales 5KG	0.1g
	PTS10	Sericol Pantone Scales 10KG	0.2g
	PTS15	Sericol Pantone Scales 15KG	0.5g

The latest scales include Pantone colour formula for the following ink ranges:

Flexo JD
